

Pittsburgh wasn't built by steel alone—it was built by chemistry. From metallurgy and glass to polymers, coatings, and modern construction materials, chemistry has shaped our region for generations. Help us celebrate that legacy during National Chemistry Week 2026 by volunteering for *Chemistry Under Construction* and inspiring future scientists through hands-on activities and demonstrations.

In partnership with the Kamin Science Center (KSC), the ACS Pittsburg Local Section is excited to offer the following NCW 2026 events. All events will be held on site at the KSC.

Use the link to volunteer for these events or to request more information: [NCW 2026 Preliminary Volunteering & Information Survey – Fill out form](#)

1. **ChemFest:** Saturday, October 17th and 24th 10:00 am – 3:00 pm

Our traditional tabling event aligned with the NCW theme.

Participation Opportunity: Design and host a table demonstration or serve as a general volunteer. Clearances are required. 7-8 tables per Saturday and up to 35 volunteers may be needed.

2. **Teen Night:** Thursday, October 22nd 4:00 – 8:00 pm

Showcasing hands on chemistry activities related to the NCW theme at the Science Center's monthly teen-focused event.

Participation Opportunity: Serve as a general volunteer; up to 5 volunteers are needed. Clearances are required.

3. **21+ Night:** Friday, November 6th 6:00 – 10:00 pm

Share chemistry related to the NCW theme at this fun adults-only event.

Participation Opportunity: Serve as a general volunteer; up to 10 volunteers are needed. Volunteers must be 21 or over.
